

Surface Nanostructuring via Redox Switching of Doped Polypyrrole

KS Teh, A. Hanafi, A. Mookerjee, N. Arora and Y-W Lu* (ywleen@rit.edu)
San Francisco State Univ, Cornell Univ, *Rochester Institute of Technology

- Varying the electric potential of as-deposited doped polypyrrole (PPy), which transforms between being a smooth film \leftrightarrow a rough film or; a hydrophilic film \leftrightarrow a hydrophobic film

Topology changes of PPy sample due to redox switching
